

"FOOTBALL: A WAY OF LIFE" – A YOUTH PROJECT

Get to know the World Assoc. is conducting a comparative research about values, attitudes and future expectations among young football players in the Baltic and Mediterranean region. The target groups are the football clubs in the second and third divisions. The selected clubs will distribute a common questionnaire to their members and collect the data.

The results will be presented at an evaluation seminar "*Racism, Integration and Tolerance*" in Helsinki during 2010. The invited guests are coaches engaged with youth activities and the seminar provides them opportunities to exchange views and knowledge as well as establishing partnerships and social networking among the participants.
